

1-Year Fellowship in Shoulder and Elbow Surgery, working with Mr Lars Neumann, Nottingham City Hospital (University Hospitals NHS Trust), United Kingdom

This fellowship, which is co-sponsored by Synthes, is an exciting opportunity to work in a busy Unit specialised exclusively in Shoulder and Elbow surgery of a University Hospital with an international reputation. The Fellow will have the opportunity, either as assistant or surgeon, to participate in over 200 open procedures including primary and revision joint replacements (the total number of elective cases performed by Mr Neumann in 2007 was more than 650 including arthroscopic interventions). Because of the diversity of the case-mix, the training programme can be adapted to the individual needs and interests of the Fellow. Additionally, the large database and high patient flow will offer great opportunities to carry out research. The successful applicant should have completed his/her general orthopaedic training, wanting to develop a subspecialist expertise in Shoulder and Elbow surgery.

Further details of the Fellowship, salary, timetable and a copy of the 2007 Fellow's report with a list of procedures performed, together with the contact details of the 2007 Fellow are available on request.

Help and advice on how to obtain UK registration, finding accommodation, managing the move to the UK etc, will be provided.

Applications are currently being accepted for the two terms of 2008/2009 and 2009/2010, with the **next post starting on August 1st 2008, for one year.**

EU and EEA medical candidates can transfer their general and specialist accreditation to the UK, further information on UK medical registration can be found on the General Medical Council's website (<http://www.gmc-uk.org/>).

Enquiries and application, with a full CV, operation list and names of three referees to:

Mr Lars Neumann, FRCS(Ed)

Consultant Orthopaedic Surgeon
Nottingham University Hospitals
City Hospital Campus
